* Comment. either the military supply traffic decreased in comparison to that during the months of January through March or covered only part of the shipments. However, the 588 additional carloads reported in the present report, increases the total number of cars handled during the period under review from 960 to 1,548 cars which means that, with 1,569 carloads in March and 1,564 in February, military supply traffic remained at the same level. The report covers all loadings which were made by order of the Soviet Army.
